

## HIV and Ryan White in Florida February 2017

**Over 55,000** people in Florida depend on Ryan White to provide life-sustaining HIV treatment and prevention services that they could not otherwise access.

### HIV in Florida, by the numbers.

- **103,696**: the number of Floridians living with diagnosed HIV/AIDS in 2014.<sup>1</sup>
- **1st**: in the nation for the number of HIV diagnoses in 2015. In 2015 alone, 4,849 were newly diagnosed.<sup>2</sup>
- **2nd**: in the nation for HIV related death rates in 2015.<sup>3</sup>

### Floridians depend on Ryan White.

- An estimated **55,370 Floridians** received services through Ryan White in 2014.<sup>4</sup>
  - **62.5%** were living at or below the poverty line.
  - Since Ryan White is legally required to be the “payer of last resort,” these people did not have other access to these medical and support services.
- Overall, Florida received **\$225.3 million in federal Ryan White funds** in 2015.<sup>5</sup>
  - \$85.7 million went to ADAP.
  - \$75.7 million went to urban areas such as Miami, Fort Lauderdale, and Jacksonville.

### Ryan White services keep HIV-positive individuals in treatment and care.

- When people with HIV receive treatment, they can live active, healthy lives.
- When they are disconnected from care, they can develop resistance to medications that were working for them and experience a rise in viral load that makes it much easier to transmit HIV. Moreover, HIV is still deadly without treatment.<sup>6</sup>
- Ryan White addresses this by providing services across the HIV Care Continuum.

With its unique set of services, **RYAN WHITE WORKS.**

- While only 30% of people nationwide have a viral load that is effectively suppressed as of 2011,<sup>7</sup> **81.4%** of HIV-positive clients who had received at least one Ryan White funded medical care visit have achieved viral suppression.<sup>8</sup>

After health reform, Florida will need to rely on Ryan White more than other states.

- Ryan White wraps around other resources and provides care that works for people with HIV.
- With Florida not expanding Medicaid, an estimated **16,500 of the lowest-income people with HIV** will be left out of coverage available in other states.<sup>9</sup> They will continue to rely solely on Ryan White.

No other program provides the same set of gap-filling services or care as Ryan White. Even after health reform, **Ryan White remains crucial for Florida.**
