

HIV and Ryan White in Mississippi February 2017

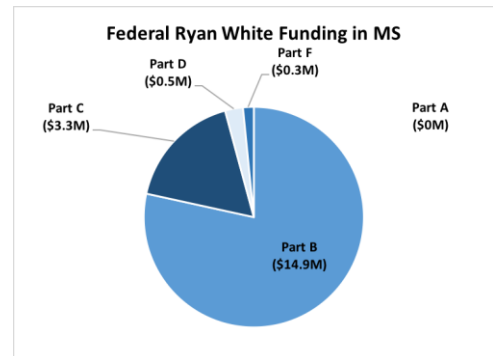

Over 4,000 people in Mississippi depend on Ryan White to provide life-sustaining HIV treatment and prevention services that they could not otherwise access.

HIV in Mississippi, by the numbers.

- **8,983**: the number of Mississippians living with diagnosed HIV/AIDS in 2014.¹
- **5th**: in the nation for HIV related death rates in 2015.²
- **6th**: in the nation for rate of HIV diagnoses in 2015. In 2015 alone, 509 were newly diagnosed.³

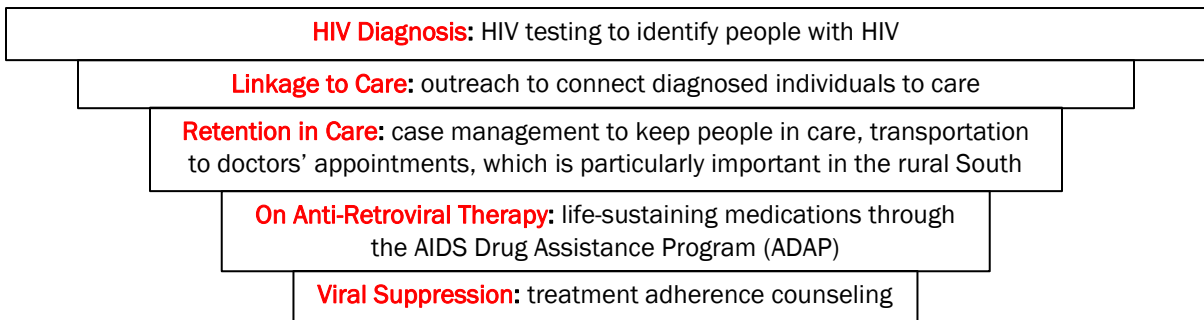

Mississippians depend on Ryan White.

- An estimated **4,357 Mississippians** received services through Ryan White in 2014.⁴
 - **69.9%** were living at or below the poverty line.
 - Since Ryan White is legally required to be the “payer of last resort,” these people did not have other access to these medical and support services.
- Overall, Mississippi received **\$19 million in federal Ryan White funds** in 2015.^{5 6}
 - \$7.4 million went to ADAP.
 - No urban areas were eligible for Part A funding. As such, Part B funding (for states) is particularly important in Mississippi.

Ryan White services keep HIV-positive individuals in treatment and care.

- When people with HIV receive treatment, they can live active, healthy lives.
- When they are disconnected from care, they can develop resistance to medications that were working for them and experience a rise in viral load that makes it much easier to transmit HIV. Moreover, HIV is still deadly without treatment.⁷
- Ryan White addresses this by providing services across the HIV Care Continuum.

With its unique set of services, **RYAN WHITE WORKS**.

- While only 30% of people nationwide have a viral load that is effectively suppressed as of 2011,⁸ **81.4%** of HIV-positive clients who had received at least one Ryan White funded medical care visit have achieved viral suppression.⁹

After health reform, Mississippi will need to rely on Ryan White more than other states.

- Ryan White wraps around other resources and provides care that works for people with HIV.
- With Mississippi not expanding Medicaid, an estimated **1,400 of the lowest-income people with HIV** will be left out of coverage available in other states.¹⁰ They will continue to rely solely on Ryan White.

No other program provides the same set of gap-filling services or care as Ryan White. Even after health reform, **Ryan White remains crucial for Mississippi**.
