

HIV and Ryan White in Texas February 2017

Over 39,000 people in Texas depend on Ryan White to provide life-sustaining HIV treatment and prevention services that they could not otherwise access.

HIV in Texas, by the numbers.¹

- **77,896:** the number of Texans living with diagnosed HIV/AIDS in 2014.
- **3rd:** in the nation for the number of HIV diagnoses in 2015. In 2015 alone, 4,476 were newly diagnosed.
- **4th:** in the nation for the number of deaths among persons living with HIV in 2014.

Texans depend on Ryan White.

- An estimated **39,282 Texans** received services through Ryan White in 2014.²
 - **84.0%** were living at or below the poverty line.
 - Since Ryan White is legally required to be the “payer of last resort,” these people did not have other access to these medical and support services.
- Overall, Texas received **\$169.9 million in federal Ryan White funds** in 2015.^{3 4}
 - \$79.8 million went to ADAP.
 - \$52.3 million went to urban areas eligible for Part A funding: Austin, Dallas, Fort Worth, Houston, and San Antonio.

Ryan White services keep HIV-positive individuals in treatment and care.

- When people with HIV receive treatment, they can live active, healthy lives.
- When they are disconnected from care, they can develop resistance to medications that were working for them and experience a rise in viral load that makes it much easier to transmit HIV. Moreover, HIV is still deadly without treatment.⁵
- Ryan White addresses this by providing services across the HIV Care Continuum.

With its unique set of services, **RYAN WHITE WORKS.**

- While only 30% of people nationwide have a viral load that is effectively suppressed as of 2011,⁶ **81.4%** of HIV-positive clients who had received at least one Ryan White funded medical care visit have achieved viral suppression.⁷

After health reform, Texas will need to rely on Ryan White more than other states.

- Ryan White wraps around other resources and provides care that works for people with HIV.
- With Texas not expanding Medicaid, an estimated **11,200 of the lowest-income people with HIV** will be left out of coverage available in other states.⁸ They will continue to rely solely on Ryan White.

No other program provides the same set of gap-filling services or care as Ryan White. Even after health reform, **Ryan White remains crucial for Texas.**
