

Impact in Texas of the Affordable Care Act (ACA)

(from OPE, U.S. Department of HHS)¹

Coverage Gains in Texas thanks to the ACA (2010-2015)

- 1,781,000 people gained coverage, including
- 205,000 young people who gained coverage by staying on their parents' plan until 26 years of age
- An overall (even w/o Medicaid expansion) 6.6% decline in the uninsured.

Gains in Care, thanks to the ACA (2015)

- 1,746,043 Medicare Part B patients received free preventive services.

Consumer savings thanks to the ACA (Q1, 2016)

- For people with ACA Marketplace Plans
 - 913,177 people received subsidies averaging \$271/month
 - equals \$3252 in savings per person per year
- For people with Employer Group Plans
 - premium decrease from 8.1% annual growth rate in 2000-2010 to a 3.5% annual growth rate in 2010-2015
 - equals \$4300 annual savings per family in 2015
 - equals \$5400 annual savings per family in 2016

All these benefits lost to Texas families if the ACA is repealed.
